Introduction

Journalism and Mass Communications have been around as long as people have learned to scratch out messages on rocks or use parchment scrolls to record important events. The field today uses newspapers, magazines, newsletters, radios, television sets, and other electronic media to communicate.

Think of the variety of job opportunities available to those in the field. For example, if you are a high school senior or college freshman today in ten years you might be one of the following:

Sports writer for a newspaper in Wilmington, Delaware

Assistant city editor on a suburban newspaper on Long Island, New York

Week end TV news commentator

Disc jockey at a San Jose radio station

Researcher for a syndicated newspaper columnist

Announcer on a radio station in Fort Launderdale, Florida

Sports promotion writer for a professional basketball team

Assistant advertising manager for a metropolitan department store

Editor of a newsletter for a professional association

High school teacher of journalism and English

Or any one of hundreds of other positions which use writing or communications skills.

From these jobs, one may rise to the top in the field or move in a tangent into other occupations.

Careers in Journalism and Mass Communications

There are dozens of different jobs open in the field and they may be clustered under these headings.

Reporter. The basic news gathering and writing position on a newspaper or broadcast station.

	Interviews, researchers, and prepares informative and interesting stories.
Photographer.	Makes photographs of major news events and takes pictures for feature or other special articles. Must have both good photographic skills as well as sense of the important parts of a story or assignment.
City Editor.	Coordinates news gathering activities. Senses major events and makes appropriate assignments of staff.
Copy Editor.	Takes reports from staff reporters and news media services and edits, rewrites, and prepares for publication.
Sports Reporter.	Attends and writes up major athletic events. May also write a column or feature articles.
Editor.	Sets policies for publication and directs staff carrying out program. May also do some writing, depending upon size of the publication.
Advertising Sales.	Solicits, receives, and prepares for publication advertising copy ranging from huge display ads to small classified listings.
Circulation Director.	Promotes publication sales and develops network of employees, contacts, and outside sources through which publication is distributed.
Camera Operator.	Takes photographs for use in news or other programs. Must be prepared to move quickly to the desired scene and exercise judgment required to obtain best results.
Scriptwriter.	Researches, writes, and rewrites (as needed) copy for broadcast journalism and other communications.
Broadcast Journalist.	Develops own copy or takes prepared copy and presents broadcast news.
News Anchor Person.	The major presenter of news on the air, generally on TV. The top newsperson on a program usually is called the "anchor"/

Sportscaster.	Prepares for and announces sports events as they occur. Must be prepared to travel with a team or to a special event and to spend many hours doing research ahead of a broadcast.
Editorial Assistant.	Helps writers by doing research, contacting outside sources, or otherwise developing material which might be used in a story.
Wire Editor.	Determines which stories, developed by major news syndicates, would be suitable for publication. May rewrite or otherwise make story more applicable to publication or its readers.
Feature Writer.	Researches and writes stories dealing with history, local people, or special events. These generally take several days to prepare.
Special Reporter.	Develops and reports in such areas as food, business, entertainment, or the courts. Continued work and research in the field develops strong special expertise.

Preparing for the Field

The best academic background for a career in communication is provided by college study in the field of journalism or mass communications or in a liberal arts field such as English or political science. Sometimes special combinations of study are used by persons preparing for such fields as foods and dining out (combining study in home economics and journalism). Finance and business (combining study in economics and English), or entertainment (combining study in drama and journalism).

Many who are interested in journalism and mass communications take a bachelor's or advanced degree from one of 300 colleges and universities offering such programs. These range from small departments in some general purpose colleges to highly specialized communications schools located within major universities.

In a recent year, these were the degrees awarded by field and level of degree.

	Bachelor's	Master's	Doctor's
Journalism	10,402	1,128	27
Public Relations	1,215	78	0
Advertising	2,677	136	3
Radio/Television	7,233	312	11
Communications, Other	20,139	1,846	171

Around 60 percent of the above degrees were awarded to women. In a recent survey of every 100 college freshman, 2 percent of the men and 3 percent of the women said they were interested in a writing/journalism career.

In recent years a higher proportion of the students have been preparing for public relations (12.6 percent in 1986 versus 5.8 in 1976), advertising (17.8 versus 10.3 percent), and broadcast (20 versus 14.7 percent.) Relatively fewer students are in news reporting and related fields.

Details on the types of programs offered at accredited schools, along with other useful information, appears in the Journalism Career and Scholarship Guide prepared annually by the Dow Jones Newspaper Fund (PO box 300, Princeton, NJ 08540). It also publishes a free Minority Journalism Career Guide.

Along with academic preparation for the field, practical work experience is very helpful in assessing your real interest in careers in journalism and mass communication and in demonstrating that you can perform well in the field. This may include work on a high school or college newspaper or magazine, writing free lance articles for publication in local or national journals, editing a club or social organization's newsletter, or working part-time or during the summer for a local newspaper or advertising agency.

Employment in the Field

In recent years, a number of programs have been developed to help minorities prepare for careers in journalism and details on many appear in Section II of this booklet.

Despite these efforts, minority employment in journalism and mass communications lags far behind the proportion of minorities in the general population. According to data presented in Professional Women and Minorities developed by the Commission on Professionals in Science and Technology, these

were the proportions of women, black and Hispanic workers in the fields below in 1986:

	Total employed	Percent of total who were ...		
		Women	Black	Hispanic
Editors and reporters	251,000	50.5%	3.8%	4.4%
Photographers	127,000	31.9	5.7	3.5
Public Relations Specialists	157,000	51.7	6.9	3.1
Announcers	55,000	20.0	8.3	3.2

In a national survey of the first jobs taken by journalism graduates in 1984, the Newspaper Fund reported these activities in the fall after graduation:

Employer/status	**Percent**
Daily or weekly newspaper	16.6%
Radio or TV station	10.6
Public Relations	8.5
Advertising	8.6
Magazine	2.8
Free lance writer or photographer	1.3
Other media related jobs	7.4
Subtotal media	55.8%
Non media sales Management, etc.	15.6
Non media, other jobs	9.5
Additional education	7.4
Unemployed, including not seeking work	11.7
Subtotal, other	44.2%
Total	100%

The most detailed salary data is also based upon 1984 journalism graduates and shows that incomes, at least during the first years, is not as high as in many other fields. This reflects the relatively large number of students who are interested in the field and the competition among media as small town newspapers struggle against the inroads of broadcast news and metropolitan papers find paper, distribution, and labor costs mounting higher than revenues from advertising and sales.

Type of employer	Median starting salary
Daily newspapers	$12,000
Public relations	15,000
Advertising	13,300
Radio/TV	11,200

There were exceptions to these averages, of course. Some hired for major city newspapers, for example, began at $25,000 or more. Many newspapers and broadcast stations have standard pay scales, set by union-management contracts. On some of the country's largest newspapers it is possible to earn from $50,000 to $75,000 as a featured reporter. Those with the personality, appearance, and knowledge to become tops in the field of TV news reporting may earn from $100,000 to $200,000 a year. But, as in any field, competition is keen. One starts out in a modest position at a modest salary and hopes that one's ability and the breaks that effect every career combine to facilitate advancement.
